Fund focuses on the co-financing of high-quality television series developed in co-production with a Flemish TV broadcaster. This includes fiction, animation, documentary and cross-media developments of TV series. For applications concerning foreign series, at least 50% of the financing must be guaranteed, with at least 20% of funding coming from Flanders. It is also a requirement that a Flemish television broadcaster should be financially involved in the production of a foreign series.

Financial support to audiovisual productions that spend (part of) their budget within the Flanders Region. Belgian producers can apply to receive up to 400,000 euros refundable advances by way of economic support to cover their audiovisual expenses in the Flanders Region. Foreign producers interested in applying for the fund can coproduce with a Belgian producer that satisfies all the selection criteria. Fiction, documentary or animation films with a running time of at least 60 minutes and animation series consisting of at least three episodes with a minimum total broadcast time of 60 minutes for the whole series are eligible. The (co-)production must enrich the cultural heritage of Flanders and invest a minimum of 250,000 Euros in the Flanders Region. Every Euro entrusted to a producer must yield at least 1 Euro of audiovisual expenditure in the region. The maximum support per project is 400,000 Euros. The annual budget of Screen Flanders is 4.5 million Euros.

"Foreign producers interested in applying for the funds can co-produce with a Belgian producer that satisfies all of the selection criteria.

The strategy of the screen.brussels fund is to act as a co-producer for audiovisual productions that use Brussels talent and technicians during the production or post-production stages.

Screen.brussels fund has an annual budget of EUR 3 million. Belgian producers can apply with a co-produced television series to receive up to 500,000 euros of refundable advances by way of economic support to cover their audiovisual expenses in the Brussels Capital Region. Productions

SERIES LAB HAMBURG

receiving fund pledge to spend a minimum of 250,000 Euros as audiovisual expenditure in the Brussels-Capital. These expenditures can be the same as those made to gain the tax-shelter, meaning that in the end 66 % of the expenditures can be covered.

In order to qualify, the production of the audiovisual work must prove that 40% of the total funding for the production has already been acquired.

Wallimage

6 rue du Onze Novembre, 7000 Mons, Belgium

www.wallimage.be

Contact: Philippe Reynaert, CEO Wallimage, pbr@wallimage.be

Foreign producers interested in applying for the fund can co-produce with a Belgian producer that satisfies all of the selection criteria. The strategy of this fund is to act as a co-producer for tv series that use Walloon talent and facilities during the production or post-production stages. For foreign producers interested in accessing Wallimage support, the best and easiest way to do so is to first find a local co-producer.

The Wallimage TV Series Investment Line has an annual budget of EUR 1 million Euro to invest in drama series. The co-producer(s) may submit a bid of up to EUR 500,000 which they will spend in Wallonia, having a cover up to 25% of these expenditures. The expenditures made in order to gain Wallimage's support can be the same as those made to gain the Tax-Shelter, meaning that, in the end, 66% of the expenditures can be covered.

Belgian Tax Shelter

The system is open as well as to international co-productions with Belgium that meet certain criteria. For tv series an international c-production, in which the total Belgian share stated in the coproduction contract is less than 50%, is required. The participating producers must not be linked enterprises in the sense of the European definition of the SME.

Based upon the amount of qualifying audiovisual costs the production will spend in the European Economic Area (link is external), and upon the amount of direct and indirect Belgian-eligible expenses, a certified Belgian producer can provide Tax Shelter certificates to local investors. The investor must make its full payment within three months of signing the framework agreement.

Through the system, the investor pre-finances the production and/or post-production costs in return for tax benefits and a possible fixed return on investment. The Tax Shelter can provide additional funding up to 25-30% of the total qualifying expenses in the EEA. It allows the finance of up to 40-45% of the Belgian-eligible expenses.
